GUARDIAN CYBERSECURITY

SOLACOM

Rely on a trusted public safety partner
for all your cybersecurity needs

CYBERSECURITY DESIGNED FOR ECC OPERATIONS

Solacom's Guardian Cybersecurity services offer full cybersecurity protection including:

» 24/7 Security Operations Centre (SOC) monitoring of your systems

» Continuous threat monitoring detection, and response (EDR)

» Vulnerability monitoring, reporting, remediation and recovery assistance

» Customization packages based on requirements, footprint and stage of next generation evolution

With the move to next generation call handling systems, Emergency Communication Centres (ECCs) face new, more sophisticated, and potentially devastating cybersecurity threats. A single cybersecurity breach can compromise or cripple ECC operations for hours, days, even weeks. To ensure stability in public safety infrastructure, every ECC must implement a layered cybersecurity strategy that helps prevent, detect, and quickly recover from cyberattacks.

PROTECT CRITICAL PUBLIC SAFETY INFRASTRUCTURE

Guardian Cybersecurity offers complete turnkey, enterprise-grade services that combine Solacom's deep understanding of ECC operations and strength in public safety with expertise and technologies from leading cybersecurity agencies to meet the distinctive cybersecurity requirements of ECCs at each stage of their next generation evolution.

With Guardian Cybersecurity service, ECCs of any size, can dramatically reduce their cybersecurity risk and exposure, while knowing they're supported by a dedicated team of cyber and public safety professionals.

Guardian Cybersecurity eliminates the need for ECCs to source, manage, and pay for a variety of cybersecurity solutions or having to employ an in-house cybersecurity team. With Guardian, ECCs can rest assured they are protected by a team that understands the unique environment ECCs operate in allowing you to focus on your emergency response service.

GUARDIAN CYBERSECURITY

STAY AHEAD OF CYBERTHREATS
Rely on a fully managed Security Operations Centre (SOC) and the expertise of highly trained security analysts to proactively identify potential cyberthreats against any of your IT systems and immediately provide mitigations 24/7.

With our Continuous Threat Monitoring, Detection, and Response service, you gain peace of mind knowing that a highly trained team of security analysts using sophisticated intrusion detection system (IDS) and security information and event management (SIEM) software is continuously monitoring your systems in real time. If threats are detected, we work with you to implement the required remediation and recovery steps, providing fast access to additional professional services when needed.

To keep you up to date, our monthly subscription service includes regular reports summarizing all of the cybersecurity alerts received for your systems, the actions that were taken, and the latest assessment of your overall cybersecurity status.

MINIMIZE CYBERATTACK IMPACTS
Count on our Solacom support team when you need it most. Our Remediation and Recovery Assistance service provides the guidance and support your teams need to quickly resolve cyber vulnerabilities and recover from cyberattacks should they occur. If you need more assistance, we can also step in and implement the appropriate remediation and recovery initiatives.

Our professional services contracts give you the flexibility to choose the optimal level of assistance for your organization and the impacts you've experienced.

A COST-EFFECTIVE APPROACH
With Solacom's highly flexible, operating expenditure (OPEX)-based pricing models and our partnerships with leading IT security specialists, even the smallest ECCs can afford to implement the very best cybersecurity strategies and technologies available today.

» Monthly subscriptions and individual professional services contracts align cybersecurity costs with ECC budgets

» Pricing based on IT footprint aligns cybersecurity costs with ECC size

» A pay-as-you-*grow* model aligns cybersecurity costs with ECC expansion plans

ABOUT SOLACOM
Solacom (a subsidiary of Comtech Telecommunications Corp.) provides the most flexible multimedia emergency call handling solutions for emergency communications centres (ECCs). Comtech Telecommunications Corp. is a leading global technology company providing terrestrial and wireless network solutions, next-generation emergency services, satellite and space communications technologies, and cloud native capabilities to commercial and government customers around the world. Our unique culture of innovation and employee empowerment unleashes a relentless passion for customer success. With multiple facilities located in technology corridors throughout the USA and around the world, Comtech leverages our global presence, technology leadership, and decades of experience to create the world's most innovative communications solutions.
